AZKA AZEEM

MERN STACK DEVELOPER | DATA SCIENTIST | PROMPT ENGINEER | GRAPHIC DESIGNER

Karachi, Pakistan | azkaazeem804@gmail.com

ABOUT ME

I am a problem solver. I build websites and web apps that look good, are easy to use, and work well on any screen. My main focus is web development. I am also a data scientist, which means I work with data and AI, so I can add smart AI features that make my websites more attractive and unique. I also do graphic design, which helps me keep everything clean and professional. I am always learning new skills, including how to work with real clients, and I am open to internships, entry-level jobs, freelance work and teamwork.

EDUCATION AND LEARNING

Completed	**Class 8**
Ongoing	**AI and Data Science** Building my knowledge step by step through practice and personal projects.
Ongoing	**Freelancing** Learning to work with real clients, manage projects and turn my skills into real work.

EXPERTISE

Main Focus	**Web Development (MERN Stack)** Building clean, responsive web applications with React, Node.js, Express.js and MongoDB.
AI and Data	**Prompt Engineering and Data Science** Using AI skills in my web apps to add unique AI features that make them more attractive.
Design	**Graphic Design** Creating designs and mockups with Canva, Adobe Photoshop and Adobe Illustrator.
